INTRODUCTION

This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

The figures in the *Digest* are mainly totals for calendar months or monthly averages.

Some of the figures included in this *Digest* are provisional only and may be revised in later issues.

Definitions

A Supplement of Definitions and Explanatory Notes, published with the January issue, gives detailed definitions of all the terms and units used in the *Digest*. The following general definitions should be noted in using the *Digest:*

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.
Ton = long ton of 2,240 lb.
Tonne = 1,000 kilogrammes
Gallon = imperial gallon

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are normally defined in detail in the *Supplement* to the *Digest*. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

Symbols. The following symbols are used throughout:

.. not available
— nil or less than half the final digit shown
* average (or total) of five weeks

Change of basis. A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Supplementary tables

Supplementary tables published recently in the *Digest* are listed below, together with the date of the issue in which they appeared:

Estimated future total population of the United Kingdom . . . . . July 1972.

Index of industrial production, monthly figures for the years 1963 to 1970 . . . . September 1972

Changes in content

Tables 129 and 130 Value of exports (f.o.b.) and imports (c.i.f.): analysis by areas.

The figures for EEC and EFTA have been recalculated to refer to the definition of these areas at 1 January 1973 and the figures for the sterling area have been replaced by series relating to the sterling area outside Europe.

Table 164 Average weekly earnings of manual workers.

This table has now been re-based on October 1966.

(1) Equals total final expenditure on goods and services at market prices *less* imports of goods and services *less* taxes on expenditure *plus* subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3. (2) This represents taxes on expenditure *less* subsidies valued at constant rates.

(1) Including from the first quarter of 1972 certain jigs, dies and loose tools (amounting to about £8 million at constant prices). These are included throughout the series shown in Table 8.
(2) Road haulage is included with Other industries, not with Transport.
(3) Covers agriculture, forestry and fishing, construction, road haulage and other service industries.
(4) These figures differ from the totals given in Table 8 because they include an adjustment for the effect of the change in the rate of investment grants; see note on page 108 of *National Income and Expenditure 1972*.

(1) Between June 1966 and June 1967 the industrial classifications of many establishments in Great Britain were corrected. The estimates for June 1967 take account of these reclassifications and the figures for individual industries are therefore not comparable with those published for previous mid-years. Two sets of estimates are given for June 1966 i.e. (a) excluding the effects of reclassifications (for comparison with earlier estimates) and (b) including the effects of reclassifications (for comparison with subsequent estimates).

(2) Estimates for June 1969(a) are classified according to the Standard Industrial Classification (1958) and are not fully comparable therefore with the estimates for June 1969(b) which are classified on the basis of the Standard Industrial Classification (1968).

(3) The industries included in the index of production are Orders II-XVIII of the Standard Industrial Classification (1958) and Orders II-XXI of the Standard Industrial Classification (1968).

(1) The figures include established and unestablished non-industrial and industrial staff but exclude casual or seasonal staff (recruited for periods of normally less than six months) and employees of the Northern Ireland Government. Two part-time employees are counted as one whole-time employee.

(2) The figures prior to 1 July 1972 have been adjusted to show staff in current Ministerial areas so that the figures in all columns are on a comparable basis.

(3) Excluding headquarters staff, but including research and development establishments and Royal Ordnance factories.

(1) Numbers as from June 1970 are not directly comparable with earlier years because in England and Wales:
- (a) they include managerial and clerical workers previously excluded.
- (b) whole-time has now been specifically defined as 40 hours or more work per week, and
- (c) junior partners previously returned as regular whole-time male workers are now returned separately as farmers, partners and directors and excluded.

(2) Includes family workers but excludes farmers' wives.

(3) Including regular part-time workers.

(1) Orders III-XIX of the Standard Industrial Classification 1968.
(2) Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing. (3) Excluding maintenance staff.
(4) From June 1969 it is assumed that operatives stood off by an employer for the whole week have been on short-time for 40 hours each.
(5) In February 1972, the volume of overtime and short-time working was affected by the power crisis.

(1) Including ex-service men and women and other unemployed persons aged 18 years and over not classified to an industry. Unemployed school-leavers (i.e. persons under 18 not in full-time education who have not yet taken up employment) and adult students seeking temporary employment during vacation are excluded. The All industries figures are adjusted to take into account additions and deletions in respect of the statistical date notified on the Tuesday to Friday following the date of the count. All other figures from May 1972 are not so adjusted.

(2) Total in the preceding column expressed as a percentage of the estimated total number of employees.

(3) The method of seasonal adjustment is described in the *Department of Employment Gazette*, August 1972.

(1) Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost exceeded 100. The figures for 1972 are provisional.

(2) From January 1970 the analysis by industries is based on the Standard Industrial Classification 1968. Figures prior to that date are based on the Standard Industrial Classification 1958.

(3) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

(4) The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages *in progress* in that period, whether the stoppages began in that period or earlier.

(1) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month.

(2) Invalidity benefit was introduced on 23 September 1971.

(3) Including prescribed industrial disease.

(4) Excluding claims made under the emergency benefit procedure. Figures for individual months are averages of the four or five weeks starting on the first Monday of each month.

(5) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment.

(6) Up to May 1970, these estimates are based on a standing sample of claimants. Subsequent figures are provisional estimates derived from the numbers of new claims and will be replaced later by final estimates from the sample. Yearly figures are averages of twelve monthly figures.

(7) Yearly figures are averages of quarterly figures. Quarterly figures relate to the first Monday in February, May, August and November.

(8) Including pensioners in receipt of Old person's retirement pension awarded under National Insurance Act 1970 and 1971.

(9) Including a diminishing number of widows with pensions of 30s a week derived from the old Contributory Pensions Acts.

(10) Including the elder or eldest child for whom no allowance is payable.

* Average of five weeks.

(2) Quarterly estimates are derived as averages of the monthly figures.
(3) In the absence of an earnings index for February 1972 due to the effects of the coalmining dispute no index of wages and salaries per unit of output has been calculated for that month. Less reliance than usual can be placed on the latter index for January and March 1972.

(1) Excluding agricultural holdings of one acre or less in extent in Great Britain until 1969. With effect from June 1970 the census was extended in Great Britain to cover all holdings with significant output including those on one acre of agricultural land or less, at the same time about 16,000 holdings in Scotland with negligible output were excluded from the census. In Northern Ireland excluding holdings of less than one acre. (2) Excludes Scotland. (3) Includes maize for threshing in England and Wales. (4) Weight in pods. (5) Shelled weight. (6) England and Wales only. (7) Clover and rotation grasses including lucerne in England and Wales. (8) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed: the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. (9) Includes hay from lucerne in England and Wales and from permanent grass in Scotland. (10) Includes the total area of deer forest land in Scotland. (11) The fall of 1,031,000 acres between 1969 and 1970 is largely accounted for by exclusion from the census of the 16,000 holdings in Scotland referred to in note(1). (12) These items were included on the England and Wales census form for the first time at June 1969 and the figures for that year are understated. It is estimated that the figures include some 53,000 acres in 1969 and 96,000 in 1970 previously returned as crops and grass or rough grazing.

Note: Estimates for 1972 have been calculated using a revised definition of a person for Survey purposes (see *Supplement*) and in consequence are approximately 1·5 per cent lower than they would have been had the former definition been retained; estimates shown above for 1971 (and for the average of the four quarters to the end of September 1972) have been compiled using the former definition.

(1) Estimates for these groups of households are derived from comparatively small samples and have a relatively large sampling error.

(1) From January 1971, figures relate to sales by manufacturers in Great Britain employing 25 or more persons, and who are classified to MLH 274 (paint). The figures also include sales of principal products of this industry by establishments classified to MLH 271 (general chemicals) and MLH 494/1 and 2 (toys, games and childrens' carriages).
From third quarter 1971, the figures relate to sales by manufacturers in the United Kingdom.

(1) Industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings of molasses spirit in beverage spirit production are believed to be comparable with the usings in the preceding financial year – see explanatory notes.

(2) From July 1971 figures relate to sales by manufacturers in the United Kingdom employing 25 or more persons and who are classified as MLH 275 (soap and detergents). The figures also include sales of synthetic detergents by establishments classified to MLH 271 (general chemicals), MLH 272 (pharmaceutical chemicals and preparations) and MLH 279/1 (polishes).

(3) A short standard is 7,200 matches.

(1) At steel works and steel foundries. (2) At steel works, steel foundries and blast furnaces.
(3) Stocks at producers' works of ingots, semi-finished and finished steel in terms of ingot equivalent. From March 1970 the figures are revised due to re-measurement.
(4) From January 1971, figures include stock of semi-finished steel for the manufacture of heavy products previously not reported.
(5) The figures for 1970 onwards include deliveries of welded tubes over 16 inch outer diameter.
(6) 53 week period. (7) Average of fourteen weeks.

(1) Characteristic products of industries in Order VI of the *Standard Industrial Classification 1958*, except ordnance and small arms. Excluding deliveries by the smallest firms which are estimated to be about 2 per cent of the total. In general, spare parts supplied by manufacturers of complete machines are included with these machines, but parts, other than those separately specified, supplied for assembly by makers of complete machines are included in the heading for sub-contract sales and components.

(1) Spinning, doubling processing and waving parts of the cotton industry, *plus* man-made fibre, wool, carpets and hosiery industries. (2) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations. (3) The index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry and not output of that particular type of garment.

(1) The coverage of the inquiry from which this table is compiled was extended at the end of 1970 and the earlier figures have been adjusted to provide a broadly comparable series. It must be emphasised, however, that the conversions have been based on linking factors spanning the 4th quarter 1970 and 1st quarter 1971 only and they should be treated with caution.
(2) Includes sports shoes with uppers of materials other than leather and single texture plimsolls and sand shoes.

(1) From the 3rd quarter 1971 information was collected on a slightly different basis; the figures, therefore, are not fully comparable with those for earlier periods. A link between the two sets of figures is shown in the March 1972 edition of *Business Monitor*. P. 9, Carpets.
(2) Prior to the 3rd quarter 1971 these figures relate to woven carpets faced with more than 50 per cent of man-made fibres.
(3) Prior to the 3rd quarter 1971 export figures are those reported directly by manufacturers. From that date they are those recorded in the *Overseas Trade Statistics*.

([1]) Excluding building which is wholly financed from private sources. ([2]) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings Primary and secondary and Special schools. ([3]) Figures for England and Wales include the value of projects for which specific approval is not required. ([4]) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. ([5]) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. ([6]) The Scottish figures of projects approved refer to approval at the sketch plan stage, which might be some six to twelve months before the start of construction. ([7]) The Scottish figures of Under construction and Completions are based on the tender costs. The Under construction and Completions figures exclude the value of approved school projects which in 1969 amounted to £1,246,000 and £406,000 respectively.

(1) The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(2) Including new schools brought into partial use before completion.

(3) Extensions, alterations, remodelling and war damage repairs.

(1) The annual figures for road transport are estimated from periodic sample enquiries and traffic counts data. These have been revised in the light of results from the 1967/8 survey of road goods transport. From 1970 a continuing sample enquiry has allowed quarterly estimates to be made. (2) The quarterly figures relate to 13 week periods and not to three calendar months. (3) Not over 30 cwt. unladen weight. (4) Includes vehicles with drawbar trailers.

(1) Passenger journey figures for 1969 and subsequent years are not strictly comparable with those for previous years, owing to the transfer from British Rail to London Transport railways of the Bow to Upminster line on 1 January 1969 and of the London Paddington to Westbourne Park service on 1 January 1970. In addition, the new 14 mile Victoria Line was opened to traffic by London Transport in four stages on 1 September and 1 December 1968, 7 March 1969 and 23 July 1971. (2) The four-weekly averages for each year are computed from calendar year totals.

(1) The four-weekly averages for each year are computed from calendar year totals.
(2) Freight train traffic only.
(3) From January 1969, figures do not include freight carried on behalf of National Carriers Ltd. and Freightliners Ltd.
(4) From January 1972, four-weekly figures of net ton mileage are estimated.

(1) Statistics in visible trade on a balance of payments basis are obtained by making certain adjustments in respect of valuation and coverage to the statistics recorded in the *Overseas Trade Statistics*. These adjustments are summarised in Table 142 below; they are described in detail in *United Kingdom Balance of Payments 1972*.
(2) Export unit value index as a percentage of the import unit value index. (3) Affected by the dock strike. (4) Provisional.

(1) The total currency flow, together with Allocation of Special Drawing Rights and Gold subscription to the IMF. (2) From July 1972 transactions with IMF affecting the United Kingdom reserve position in the Fund are included as changes in the official reserves. (3) From 23 August 1971, valued in sterling at transactions rates of exchange. Therefore, from the third quarter of 1971 the sterling valuation of the flow does not equal the difference between the opening and closing levels which are converted at parity in Table 146.

(1) Figures are calculated to end-September 1967 at $2.80=£1, from end-December 1967 to end-September 1971 at $2.40=£1 and from end-December 1971 at $2.6057=£1. (2) Drawings from the IMF, net of repayments by the United Kingdom and drawings of sterling from the IMF by other countries. From July 1972 excludes transactions affecting the United Kingdom gold tranche. (3) Borrowing from Switzerland, with a sterling counterpart, in parallel with drawings from the IMF under the General Arrangements to Borrow. (4) Borrowing from other monetary authorities, and a consortium of Swiss banks in 1967, in the form of foreign currency deposits or assistance with a sterling counterpart. (5) From July 1972, the official reserves were redefined to include the reserve position in the IMF. From end-April to end-June 1972, this stood at £292 million.

(1) In addition to its lending, the National Loans Fund meets the interest and management charges of the National Debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. (2) Loans under the Ship Credit Scheme and to the Shipbuilding Industry Board, housing associations and building societies. (3) Loans to Votes for US military aircraft, Town and Country Planning compensation, Redundancy Fund and lending to Northern Ireland Exchequer.

(1) This is equal to Exchequer borrowing and special transactions (net) *less* receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows *less* any increase (or *plus* any decrease) in its official reserves.
(2) A negative item represents a surplus, a positive item a deficit.
(3) Including in March of each year transfer of surplus of the death duties surrendered securities account.
(4) The cumulative monthly figures do not agree precisely with the quarterly figures because of adjustments, incorporated in the latter, for accrued interest on National Savings and for issued coin. Monthly figures before April 1971 exclude N. Ireland central government debt.
(5) Excluding borrowing from the National Loans Fund.
(6) Including surrender of final balance on the local loans fund.
(7) Adjustment for redemption of government guaranteed stock.
(8) Consolidated Fund liability for service of the National Debt: balance carried over until March.

(1) Figures are not strictly comparable throughout owing to changes in the composition of the clearings. From 12 January 1968 provincial clearings, with the exception of the afternoon clearing at Liverpool, were abolished and transferred to General clearing. From 1 July 1969 all figures are worked on a 5 day week.

(2) Average of Wednesdays. Includes Bank of England notes held by the Scottish and Northern Ireland Banks as cover for their note issues in excess of the authorised circulation.

(3) Months: average of Saturdays in the consecutive four-week periods as published in *The London Gazette* or in *The Belfast Gazette*, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.

(4) Excluding coin in the Bank of England, Issue Department.

(5) Total notes and coin outstanding, *less* notes and coin held by the Bank of England, Banking Department, and by the London clearing banks, Scottish banks and Northern Ireland banks.

(6) The values of Town, General and Credit clearings were reduced as a result of mergers among the London clearing banks. The changes occurred in December 1969 and January 1970 and to a lesser extent in September 1970; their total effect is estimated to have been: Town clearing —8%, General clearing —10%, Credit clearing —11%.

(7) From 20 January until 8 March the figures are affected by a strike of Post Office employees.

(1) The annual figures are averages of the figures for February, May, August and November.
(2) Included in Other manufacturing in Northern Ireland.
(3) Excluding funds placed through the specialised financial markets.
(4) The two sets of figures show the position before and after the inclusion of £734 million fixed rate credits for exports and domestic shipbuilding (London clearing banks £697 million, Scottish clearing banks £37 million) previously included in Bills discounted prior to May 1972.

(5) Because of difficulties of classification it is not possible to include advances made by the five finance houses recognised or confirmed as banks in January 1972. These totalled £1,070 at mid-May, £1,154 at mid-August, and £1,261 at mid-November.

(6) Figures for May, August and November 1970 are not available due to the effects of an industrial dispute involving bank employees.

(1) Including for the first time, figures for five finance houses recognised or confirmed as banks in January 1972. At 15 March these institutions had £950 million of eligible liabilities and £81 million of reserve assets. Some were granted a short period in which to achieve the 12½ per cent minimum reserve ratio. (2) The figures are affected by some of the banking recognitions mentioned in footnote (1).

(1) Derived from yield-maturity curves fitted mathematically. The break shows a change in the method: an article in the *Bank of England Quarterly Bulletin* December 1972 describes the new method of calculating the curve which is now based on the prices and coupons for all stocks except a few with special features. Before 1971, the curve was fitted to yields on stocks with coupons of 5 per cent or more. (The old method was described in the March 1967 *Bulletin*). The yearly figures are averages of end of month yields. The monthly figures relate to averages of Wednesdays, except for 1971, where they are for end-months.
(2) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored.
(3) Averages of daily figures calculated from middle market closing prices.
(4) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

(1) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to October 1972, published in the *Department of Employment Gazette* for February 1973.

(2) From and including October 1967 includes (a) dock workers previously on daily or half daily engagements and (b) postmen.

(3) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 169 which cover all industries.

(1) England and Wales only. (2) Except sea transport and postal services. (3) Consisting of laundries and dry cleaning, motor repairers and garages and the repair of boots and shoes. (4) For notes on the index classified according to Standard Industrial Classification 1968, see pages 470–471 of the *Employment and Productivity Gazette* for May 1970. (5) Because of the coal mining dispute a reliable index for Mining and quarrying cannot be calculated. The December 1971 figures for coal mining have been used in the compilation of the index for All industries and services covered, and for the Mining and quarrying 1971 annual average.

(6) As industrial activity was severely disrupted by restricted electricity supplies the monthly survey was not carried out in February so figures cannot be calculated for this month. (7) Provisional. (8) Insufficient information is available to enable a reliable index for Agriculture to be calculated for the current month but the best possible estimate has been used in the compilation of the index for All industries and services covered.

(1) The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The information relates to the end of the month and, where necessary, the figures may be revised to take account of any changes having retrospective effect or reported belatedly. A brief note on the method of compilation of the figures is given in the current issue of the *Department of Employment Gazette*.

(2) In general, males under 21 and females under 18 years of age.

(3) The term Manufacturing industries covers all industries included in Orders III–XIX of the Standard Industrial Classification 1968.

(1) The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

(2) The monthly totals in the columns headed Increase and Decrease relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed Net increase, is therefore the overall net increase for the year.

(3) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

(1) The Cost of Living Advisory Committee (now renamed the Retail Prices Index Advisory Committee) recommended in 1962 that until a satisfactory index series based on acutal prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. Tne index for meals out for 16 January 1968 implicit in this recommendation was 121·4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

(2) These are the weights which would have been used in 1968 if expenditure on meals out had been treated as in previous years (see footnote (1)). The weights actually used are given in the following line.

[1] Based on manufacturers' list prices.
[2] The market-price series are based on prices before the addition of subsidies paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.
[3] The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies paid to producers; that for milk on prices paid to producers by the marketing board and that for potatoes on producer prices, sometimes supported by the Potato Marketing Board.
[4] Figures to June 1972 have been adjusted to final deficiency payments. [5] Maincrop potatoes only.
[6] Based on guaranteed minimum prices to producers at packing station until March 1966, then to March 1970 on BEMB prices to producers under the Egg Contract Schemes. From April 1970 until March 1971 minimum producers prices as in years prior to March 1966. Thereafter based on average price paid to producers at packing stations.
[7] Based on net prices to farmers after deduction of subsidy. [8] Provisional.

CENTRAL STATISTICAL OFFICE

STATISTICAL NEWS No. 20

FEBRUARY 1973

The purpose of this quarterly publication is to put the user of statistics in touch with all that is going on in the world of official statistics. Each issue contains three or more main articles treating selected topics in depth. Shorter notes report what is new in official statistics. A cumulative index of the contents makes the book a most useful reference source.

The issue, published on February 22nd, contains, in addition to five articles, a section which summarizes amendments to the *List of principal statistical series and publications*. This section is a regular feature of *Statistical News*, enabling users of the *List* to keep it up-to-date. The articles are:

Epidemiology and occupational medicine
by A. J. Fox

The Further Education Statistical Record
by C. J. Bellis

Progress of statistical work at the Business Statistics Office
by M. C. Fessey

A national heavy goods vehicle register
by T. F. J. Hobson and R. M. Taylor

Inter-city statistics
Note by the Press and Information Service, Central Statistical Office

In addition to these main articles, this issue contains about 50 shorter notes covering a wide variety of topics.

CENTRAL STATISTICAL OFFICE

ABSTRACT OF REGIONAL STATISTICS No. 8 1972

This annual publication has been prepared by the Central Statistical Office to meet the demand for detailed regional information and is supplementary to the national figures published in the *Annual Abstract of Statistics*.

Issue No. 8 provides a wide coverage of economic and social statistics by Standard Regions and many of the tables also give details for sub-divisions of regions and for conurbations. It contains an outline map of the Standard Regions and includes a full description of these regions and their sub-divisions, defined in terms both of local authorities and employment exchanges. An index of the sources of the statistical data enables users to obtain later figures as they appear.

The subjects covered include:

AREA AND CLIMATE
POPULATION
SOCIAL SERVICES
EDUCATION
EMPLOYMENT
ENERGY
PRODUCTION
CONSTRUCTION AND INVESTMENT
DISTRIBUTION
TRANSPORT
SURVEY OF INCOMES
SURVEY OF EARNINGS
FAMILY EXPENDITURE SURVEY
NATIONAL FOOD SURVEY
